مصنع الوصيمي للحديد الصناعي
AL-USAIMI FACTORY FOR INDUSTRIAL STEEL

INTRODUCTION

Since its inception 50 years ago, Othman Abdul Rahman Al-Usaimi Company was able to distinguish itself as a leading company in the steel business, and contributed in the manufacturing advancement in the kingdom of Saudi Arabia. Al-Usaimi is able to build four factories in Second Industrial Area, Dammam with the latest technologies. To serve its branches throughout the kingdom and GCC states.

Most recently Al-Usaimi established it's Steel fabrication Division, applying latest technology from the engineering design software, fabrication equipment, professional and dedicated personnel.

It has since completed successfully many projects in the kingdom and GCC straits, and obtained all required quality certificates.

This helped Al-Usaimi group to keep pace with manufacturing revolution in the kingdom with the vision 2030.

MISSION

To perform for our customers the highest level of quality and safety in construction services at fair and market competitive prices.

To maintain the highest level of professionalism, integrity, honesty and fairness in our relationship with our professional associates and customers.

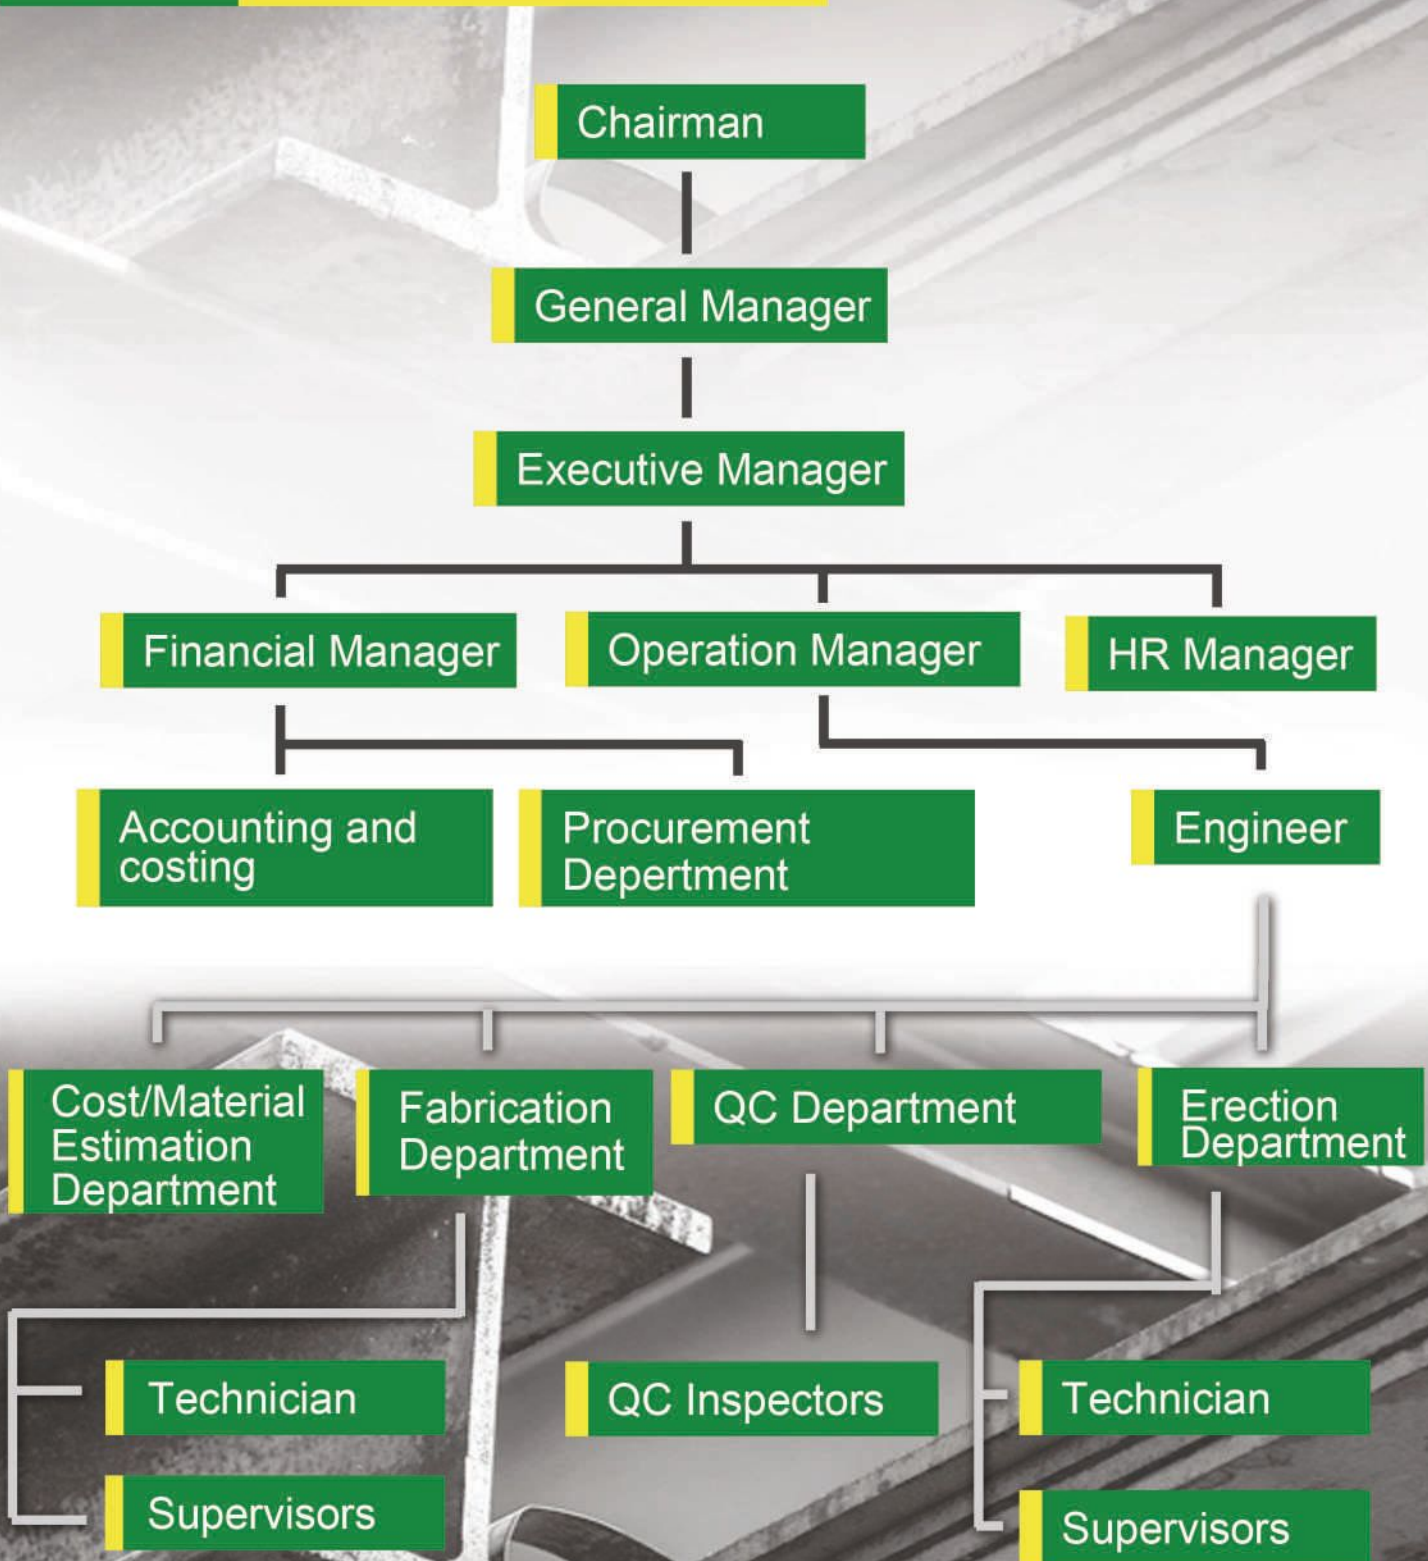

To grow by continually providing useful and significant services and solutions to market, we already serve.

VISION

To become the most leading company in construction and engineering solution in the era by expand into new areas that build on our competencies and customer interest to becoming the preferred contractor of choice.

Organizational Chart

Quality Policy

Our Quality Policy is defined and strongly driven by the following management principles and behavior:

1 Build a mutually profitable relationship with our customers, ensuring their long-term success, through the understanding of their need and the need of their customers as well.

2 Achieve our commitment for quality, cost and schedule.

3 Enhance the systematic research and use of best preventive practices at all levels and ensure reliable risk management.

4 Drive continual improvement and innovation based upon efficient business processes, well-defined measurements, best practices, and customer surveys.

5 Develop staff competencies, creativity, empowerment and accountability through appropriate development programs and show strong management involvement and commitment.

Al-Usaimi strive to be the best provider of inspection services in the industry. Through the use of these guiding principles, everyone in Al-Usaimi is accountable for fully satisfying our customers by meeting or exceeding their need and expectation with best-in-class solutions and services. Our primary goal is customer satisfaction with high quality

ISO 9001: 2015 Registration
Number: - 4146802

ISO 14001: 2015 Registration
Number: - 4146803

1. PURPOSE

This procedure provide guidance in the establishment of overall safety and health policy for our industrial services and defines responsibilities for implementation and enforcement to management, supervisor and individual employees.

2. SCOPE

Policies and Procedures issued under the authority of this standard shall apply to all activities at our industrial services,t where employees and contractors are performing work.

3. METHOD

We shall be take every reasonable precautions of prevent injury to its employees, customers and the public from accidents associates with its operations.

We provide a safe and health work environment for every employ-ees, contractors and visitors.

We fulfill all requirement of Government, Royal Commission local and customer codes, regulations and direction.

We provide the necessary safety equipments, safety devices and training to ensure the safety of all employees, contractors & visitors.

We establish an accident prevention program that will includes hazard identification, written safety procedures standards and responsibilities.

Safety program requirements will be implemented and consistently enforced by all levels of the management organization. Personal example and safety leadership must consider an integral part supervisory performance eveluation criterion.

We include management systems to the program which monitor performance and which provide mechanisms for improvements and charges.

1. Plant And Machinery

Sr. No.	Machine	Quantity
1	Tube Mill Work from 1mm to 6mm of thickness	Eight Lines
2	Cut to Length Line upto 16mm	Three Lines
3	Corrugated Sheet Machine	Three Lines
4	Sheet Bending Machine (Manual-CNC)	Three Machine
5	Punch Machine upto 30mm	Four Machine
6	Hot Dip Galvanize ASTM 123	One Line
7	Sand Blasting	One Line

2. Machine Shop

Sr. No.	Machine	Quantity
1	CNC / Lathe Machine	Two Machine
2	Milling Machine	Two Machine
3	Shaper Machine	One Machine
4	Welding Machine (Arc/MIG)	Twenty Five Machine
5	Radial Drilling Machine	One Machine
6	Plate Rolling Machine	One Machine
7	Hydraulic Press	Two Machine
8	Plasma Cutting	One Machine

3. Cranes

Sr. No.	Machine	Size	Quantity
1	Mobile Crane	50 Ton	1
2	Mobile Crane	25 Ton	2
3	Overhead Crane	5 Ton	5
4	Mobile Lifter	2 Ton	1

4. Employees and Manpower

Fabrication Engineer	Design Engineer	Erection Engineer	Supervisor		
4	2	3	6		
Fabrication	Erection	Mechanic	Electrician	Welder	Labor
50	42	10	10	52	40

Service Offered

A. Steel Fabrication And Erection

- 1 Steel Structure Fabrication and Erection
- 2 Skid and Shed Fabrication
- 3 Sandwich Panel Work
- 4 Sliding Automatic / Manual Gates
- 5 Base Frame for Machines and Production Line
- 6 Structural Platform
- 7 Tank and Pressure Vessel
- 8 Chiller Unit
- 9 Cooling Tower
- 10 Crane Girder

Service Offered

B. Electrical And Mechanical Solution

- 1 Electrical and Instrumentation Work
- 2 Distributed Control System (DCS)
- 3 Cable Laying, Termination, Tray and Accessories
- 4 Overhead Crane Installation, Panel and Testing
- 5 Overhead Crane Maintenance and Calibration
- 6 Installation of Machines and Production Line
- 7 Machining and Balancing Work
- 8 Industrial Maintenance and Shutdown Work

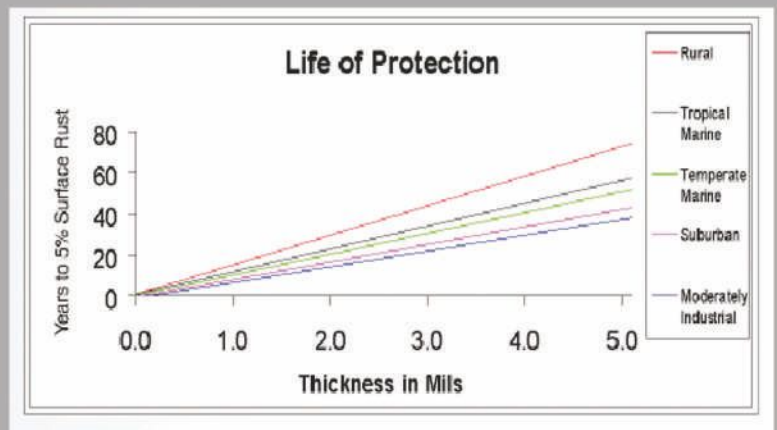

Galvanize

Protecting steel is an essential factor in the economic utilization of steel in all applications. Every year rust and corrosion cause damage in steel and result in loss of several billion Riyals in buildings, plants, equipment, tools all over the Kingdom of Saudi Arabia.

Through the years companies used many corrosion prevention systems to protect its steel, like electroplating or coating with epoxy and any other type of protective paints. These systems can only provide a limited protection over a limited period of time. With time, coating will be compromised, from that point of time corrosion will begin spreading again beneath the protective coating film. Restoring the protection will require repeated treatments every time, resulting in higher risk of steel strength compromised and compounding costs over time for repeated inspection and treatment.

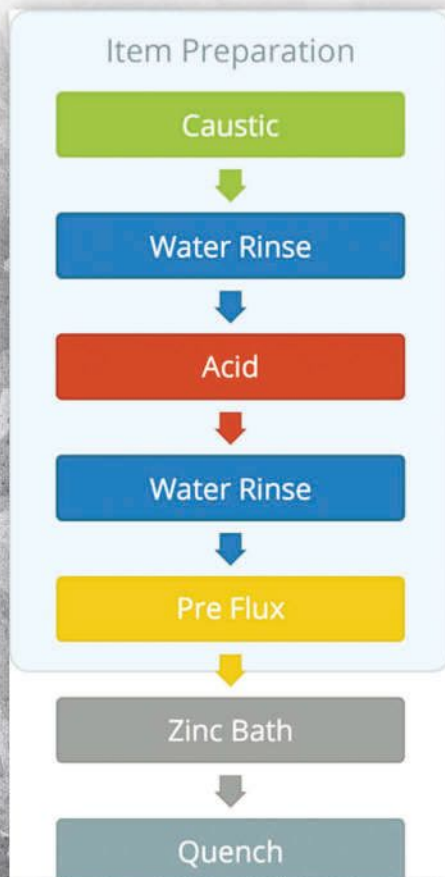

Benefits of Utilizing Galvanized Steel

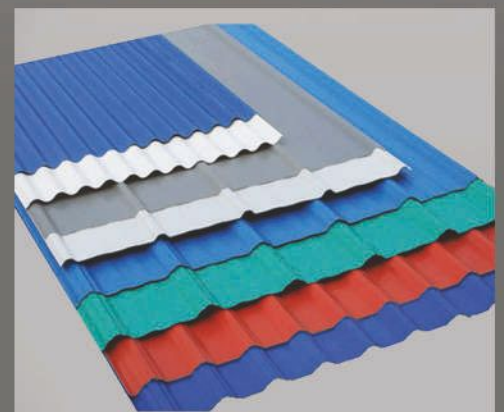

Galvanize

Hot dip galvanizing protects the steel surface against corrosion in two ways; it shield the base metal from atmosphere because it is more electronegative than iron, also the protective zinc layer will seal the steel surface metallurgically from its environment. If the surface is damaged in any way the remaining zinc in surrounding galvanized area will maintain the protection by the cathodic (or sacrificial action). This means galvanizing steel will provides the best quality, lowest risk and lowest long-term costs (in many cases also the lowest initial costs), for any steel item shape or size, compared to any other form of corrosion control and prevention

Hot dip galvanizing is also environmentally friendly since it will increase the expected life span of the steel products for many years (over 70 years), and since both steel and zinc are fully recyclable at the end of their service life without the loss of any of their chemical or physical properties.

 Sir, Talal,

We are pleased to inform you that OTHMAN A. AL-USAIMI & PARTENERS TRADING CO is already considered a potential supplier to Saudi Aramco under Vendor Code: 10014757. As per your Commercial Registration, the following Material Service Groups (MSG's) are assigned to you:

170000	General Building Material
157000	Household, General Hardware
135000	Plumbing Supplies

This approval, however, should not be construed as a commitment by Saudi Aramco to purchase from you but your establishment will have the opportunity along with other approved sources to respond to requests for submitting proposals in accordance with Saudi Aramco's established policies and procedures. All purchase agreements and orders will be issued based on the name and address stated in your Commercial Registration (CR) as stated above.

Please note that evidence of representation from your supply source(s) must be supported by letters of confirmation stipulating the territorial coverage and specific product lines involved. Your supply sources must have been accepted as qualified suppliers of the range of materials that you wish to supply. It is also important that you advise us immediately of any changes in the agreements which you have negotiated with your supply sources and/or changes in your contact information such as postal address, telephone and fax numbers.

Should you have any questions, please call Najib Al-Sharikh on 874-0318.

Ali M. Al-Hussain
 ALI M. AL-HUSSAIN, Supervisor
 Supplier Relations Management Unit

It is the responsibility of the supplier to notify Saudi Aramco Supplier Relations Management Unit of the following:
 1. Change of Name/Address/Company
 2. Any change of the supplier location (sub sourcing fabrication of major components)
 3. Discontinuance of fabrication or supply of approved commodities (SCOMA, SCATS and/or MSGs)
